

IMT Pre-Apprenticeship Program

Industrial Manufacturing Technician

About the Program:

The Industrial Manufacturing Technician Pre-Apprenticeship helps high school students begin a pathway to a career in manufacturing. Due to changing manufacturing technologies, entry-level workers require higher skills than before and employers are struggling to recruit and retain these type of workers.

Apprenticeships give students fantastic experience in the working world! Hit the ground running!

Online Curriculum

- Safety
- Quality Practices & Measurement

Manufacturing is a thriving business and a driving industry to our economy with jobs that are interesting, engaging and satisfying!

Key Benefits for Students:

- Stackable credentials that are a foundation for multiple career pathways
- Leads to industry-recognized credentials recognized nationally
- Career exploration activities with local manufacturing companies
- Career coaching to assist in starting a career in manufacturing
- Networking with other pre-apprentices from other local school districts
- Guaranteed job interview upon completion of the two online certifications
- Once hired by an employer, apprentices are regular, full-time employees
